PAPER 2 PAPER

PERSONALIZED PAPER CUPS

Our **Paper 2 Paper cups** are 100% recyclable and can be collected along with old normal paper. This makes them a sustainable choice for offices, events, and hospitality businesses.

Key Considerations:

- **Empty and Dry:**

Ensure that the cups are completely empty (no coffee or tea remnants) and dry before disposing of them with the old paper.

- **Coordinate with the Waste Company:**

Always check with your waste processor to confirm if they accept Paper 2 Paper cups in the paper stream, ensuring compliance with recycling guidelines.

With Paper 2 Paper cups, you make an environmentally conscious choice that is easy to integrate into your waste separation process!

Key Aspects of the Regulations:

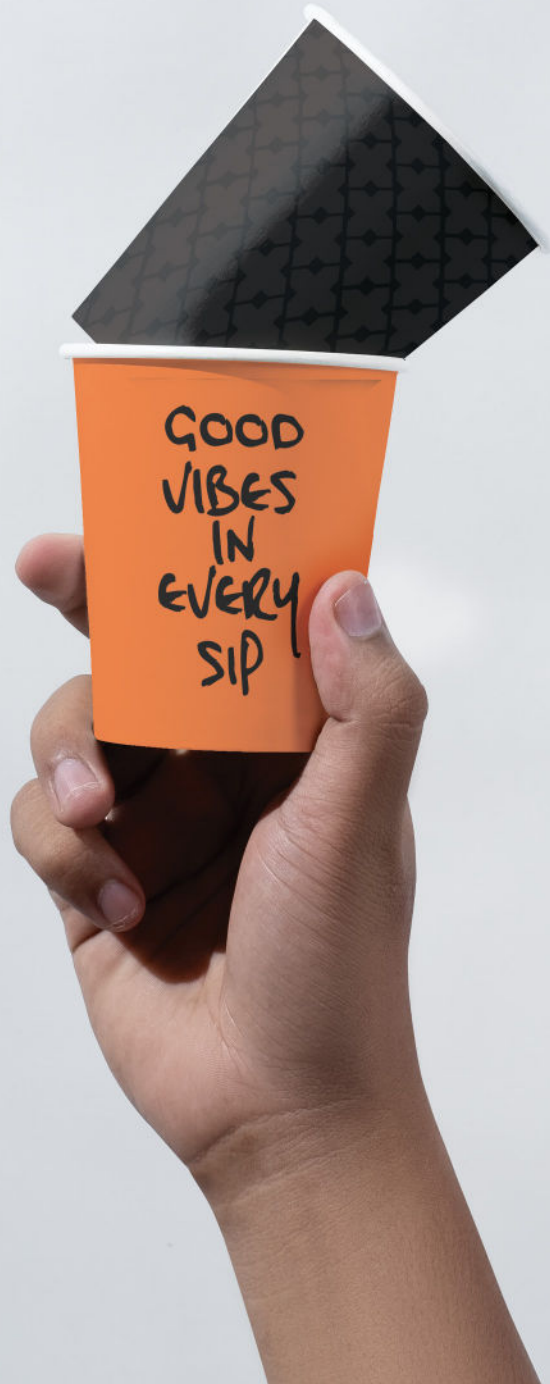

Record-Keeping Requirements

For companies and organizations using Paper 2 Paper cardboard cups, it is mandatory to:

- Register the usage and collection: How many cups are ordered, used, and collected?
- Account for how the waste is processed. This can be done by collaborating with a certified waste processor who can provide the necessary data.

1. Why These Regulations?

The regulations aim to reduce the environmental impact of plastic-containing products, improve recycling, and prevent waste. By collecting cups separately, the materials can be recycled more effectively, contributing to a circular economy.
